This presentation would focus on developing priority based emergency protocols that allow you to respond to an emergency in a pre-planned manner. It removes panic and unnecessary thought from the situation and allows you to proceed according to the pre-planned protocol. ROD L. MELDRUM

1. What Caused the Destruction at the Time of Christ's Death? The New Madrid, Missouri Earthquake. Description: Many have speculated that the destruction observed in the Book of Mormon at the time of Christ's death must have been caused by a volcanic eruption, yet there is no mention of volcanoes in the text. Could there be another explanation? The Heartland of North America is underlain by a earthquake fault system called the New Madrid Seismic Zone that caused massive catastrophic destruction when it unleashed over 2,000 earthquakes in 1811-1812. Did a similar event occur near the time of Christ, and what are the implications for the future of the United States of America?
2. Title: The New Madrid Earthquake Zone: Book of Mormon Parallels of Future Events in America's Heartland (part 2) Description: Those who know about the New Madrid Earthquake Zone understand the impact a massive event, like the one that rocked the interior of America for 5 months in 1811-1812, could have. The devastation then was enormous, but pales in contrast to what a similar event will do *when it happens in the future*. Does the Book of Mormon contain the answers to previously unknown patterns of destruction that occurred anciently, historically, and that may be a precursor to future catastrophic events that await America's Heartland? Come find out what the future may hold through Book of Mormon parallels that proceed a visit by Christ to America.

Rod L. Meldrum President - The FIRM Foundation and The Heartland Book of Mormon Evidence Research, is a researcher, author and international lecturer on the truthfulness of the Book of Mormon, its historical efficacy and the scriptural and physical evidences that have recently been discovered indicating North America as the location where its epic history played out. His highly referenced and comprehensive research, as shared in live presentations and educational materials, has created a "swelling movement within the Church" according to Seth Perry of the University of Chicago Divinity School. His depth of research and highly informative and engaging visual presentations make him one of the most sought after speakers and defenders of the Book of Mormon across the globe.
